

CLOUD COMPUTING ESSENTIALS LAB EXERCISE

LAB#	SERVICE	SUBTOPICS	CATEGORY
1	EC2	<ul style="list-style-type: none"> • INSTANCE [LINUX / WINDOWS] • INSTANCE TYPE • AMI • KEYPAIR • ELASTIC IP • VOLUME • SECURITY GROUP • TARGET GROUP • AUTOSCALING • ELASTIC LOAD BALANCING • Connecting using third party tool Putty • Custom AMI • Installing Apache/Nginx using User Data 	Compute
2	S3	<ul style="list-style-type: none"> • Bucket • Operations on Bucket • Bucket Policy • Versioning • Static Web Site Hosting • Life Cycle Configuration and Management 	Storage
3	VPC	<ul style="list-style-type: none"> • VPC • Internet Gateway • Subnet • Route Table • Routes • Custom VPC • Custom Subnet [Public and Private] 	Networking & Content Delivery
4	IAM	<ul style="list-style-type: none"> • Identity Access Management Service • Users • Group • Roles • Policies 	Security, Identity and Compliance
5	DynamoDB	<ul style="list-style-type: none"> • NoSQL Database Service • CRUD Operations • Configuring AWS CLI using Security Credentials • Accessing the service using AWS CLI 	Databases
6	RDS	<ul style="list-style-type: none"> • Relational Database Service • MariaDB and MySQL • Connecting RDS Instance from Local Machine (Windows) using MySQL workbench • Performing CRUD operations • Connecting RDS Instance from EC2 (Linux) using mariadb105-server • Performing CRUD operations 	Databases
7	Elastic BeanStalk	<ul style="list-style-type: none"> • Deploying WEB Application Elastic Beanstalk [Nodejs Env] 	Compute
8	Cloudwatch	<ul style="list-style-type: none"> • Amazon resource monitoring service • Creating alarms on resource metrics • Custom Dashboards 	Management And Governance
9	SNS	<ul style="list-style-type: none"> • Simple Notification Service • Topics • Subscribers 	Application Integration

10.	Kinesis	<ul style="list-style-type: none"> Real Time Data Capturing: Kinesis Streams Partition Key Shards Sequence Number Use Case1:  <pre> graph LR AWS[AWS] --> S3[S3] S3 --> Producer[Producer] Producer --> Kinesis[Kinesis Stream] Kinesis --> Consumer1[Consumer #1] Kinesis --> Consumer2[Consumer #2] </pre>	Application Integration
11	Lambda	<ul style="list-style-type: none"> Serverless Processing Nodejs Code AWS SDK in code 	Compute
12	Docker	<ul style="list-style-type: none"> Desktop Docker Containerization Images Volumes Pulling and Pushing Images on Docker HUB Container Lifecycle : Create Start Stop Delete Port Mapping Logging Running application terminal 	Containers
13	Kubernetes	<ul style="list-style-type: none"> Container Management and Orchestration Minikube Installation and KubeCtl Master Node and Worker Node PODS: Deployment, Service, ConfigMap, Secret, Ingress 	Container Management & Orchestration
14	Cloudformation	<ul style="list-style-type: none"> Infrastructure as Code EC2 Instance ElasticIP Security Group KeyPair S3 Bucket Versioning Bucket Policy VPC Subnet RouteTable Route 	Management And Governance
15	Amazon Lex	<ul style="list-style-type: none"> Conversational Chat bots [AI] 	ML and AI
16	KMS	<ul style="list-style-type: none"> Key management Service Amazon owned keys Amazon managed keys Customer Managed Keys (CMK) Symmetric & Asymmetric Keys Client-Side-Encryption Vs Server-Side-Encryption Creating CMK with Key Material source KMS Creating CMK with Key Material source External openssl 	Security, Identity and Compliance
17	Cloudfront	<ul style="list-style-type: none"> Content Delivery Network 	Network and Content Distribution

		<ul style="list-style-type: none">• Concept of Edge Locations, Regional Edge Location, PoP's• Origin Server, Cache Policy• Use Case1: Making EC2 with Apache Installed as origin server and creating CloudFront Distribution for it to render Apache index page
